I have added code to all the web pages that have schedules on them that force the pages to "Refresh" after they have been open for 10 minutes. So, if you leave one of those page open for over 10 minutes, and if you happen to be watching it during the 10 minute mark, you will see a definite "Blink" when the page refreshes.

I recently ran across a page layout in MS Word that would not open properly in Open Office. Since MS Office is now available by subscription only (monthly or yearly payments), a lot of people are switching from MS Office to Open Office (It's a free download). So, a file that opens in MS Office only is not a good idea.

The Missouri Federation web site set a new record for March. I was the first month that the website had over 2000 hits.

All the calendar pages have been written for 2025 & 2026 for the Missouri Federation & St. Louis Metro websites. This may not sound like much, but that is a total of 96 web pages.

Edythe mentioned that there is a link to the ARTS Report Health Benefits video's on the Missouri Federation website home page. Another link that has been there is a link to the USDA monthly Webinars. These webinars have a different topic every month. This month's webinar was yesterday and the guests were the national convention's General Chairmen. I haven't been sent the topic & guests for the May webinar, but I will post it on the home page when I get it.

I have set up a section on the Missouri Federation meeting web page specially for phones and tablets. There is a QR code on the page that you can use to make it easier to open on your phone. It has links to the agenda and all the reports in a form that are easy to access & read on your phone.
