

Wireless Microphone Info  
Tony Ahart

Several are available in the range of \$160-\$170.

I spoke with an audio representative at Sweetwater.com; they have two:

- He recommended the **Samson Stage 212 Dual-Channel Handheld VHF Wireless System** for \$161.57. I believe this was \$159.95 at Amazon.
- There was another one listed at Sweetwater that looked ok. **Behringer UM302MIC** \$169.

I found at bhphotovideo.com a **Nady DW-22 HTHHHT Digital Wireless Microphone System. (Dual Handheld Mics)** for 169.99.

Any in this price range will probably work fine for our meeting purposes.

I think most of these have XLR connections but will need a 1/4 jack for the connection to the lecturn. XLR-1/4 cord
